* Hosted Exchange

with BlackBerry™ integration

Vox Datapro is a leading Telecommunication Service Provider focused on providing Internet connectivity and converged Internet Protocol (IP) services to business customers. Established in 1998, our practical connectivity solutions are designed around your specific business needs and priorities, helping to support your mission-critical communications.

Vox Datapro delivers all connectivity solutions via a world-class infrastructure. Our Service Level Agreements ensure peace-of-mind, while our 24-hour helpdesk fully supports and monitors services to ensure that no matter what size your business, you remain connected around the clock.

Hosted Exchange with BlackBerry integration

Product Information

Vox Datapro's Hosted Exchange solution centrally stores all your mailbox information on the exchange server in our Data Centre. As opposed to Post Office Protocol (POP) email, which you can only access from the computer you downloaded it from, Hosted Exchange allows you to access your mailbox (including calendar, contacts, tasks, etc.) in 'real-time' from any internet-enabled device, at any time of the day, from anywhere in the world. Hosted Exchange provides an affordable, premium email service that provides your business with the flexibility needed to communicate better.

BlackBerry Enterprise Integration

Our Blackberry module for Hosted Exchange is ideal if you or your colleagues need to access the Hosted Exchange service from a BlackBerry mobile device. By using a BlackBerry handset, employees now have the freedom to stay in touch with your team and access critical business information from wherever they are, at any time of the day.

Features

- Microsoft Exchange email with 5 mailboxes
- Contacts, calendar, sent items, tasks, memo pad integration
- IMAP/POP/HTTP connection
- Junk email filtering and reminders
- Multiple address books
- Create desktop alerts
- Hosted BlackBerry Enterprise Server:
 - BlackBerry "Push" technology, which enables the automatic delivery of a message to a BlackBerry smartphone as it is received on the Exchange server

- Wireless synchronisation of all e-mail and calendar activities with users' Microsoft Exchange mailboxes
- Compose, send, read, forward, reply to, and delete messages
- Full contacts, calendar, sent items, tasks and memo pad integration
- Full access to your company's contact address lists when online
- View and forward e-mail attachments

Benefits

- Provides flexibility – access mail from any terminal
- Lowers the risk of losing important email history and information contained in emails and attachments due to technical failure or theft of the main computer that you use in your business
- Minimises the costs, issues and downtime caused by email-borne viruses
- Reduces the amount of time wasted by staff reviewing unwanted spam email
- Allows your staff to share information and collaborate more efficiently
- BlackBerry Enterprise Integration:
 - Improves communication between co-workers
 - Streamlines operations
 - Turns downtime into productive time
 - More work completed in a day

Options

- BlackBerry Enterprise Integration
- Additional mailboxes and storage space
